

SOME GOOD TO KNOW FACTS ABOUT WALDEN WATER

VS. BOTTLED WATER

Someone somewhere put water in a plastic bottle...

The plastic bottles were branded and then shipped...

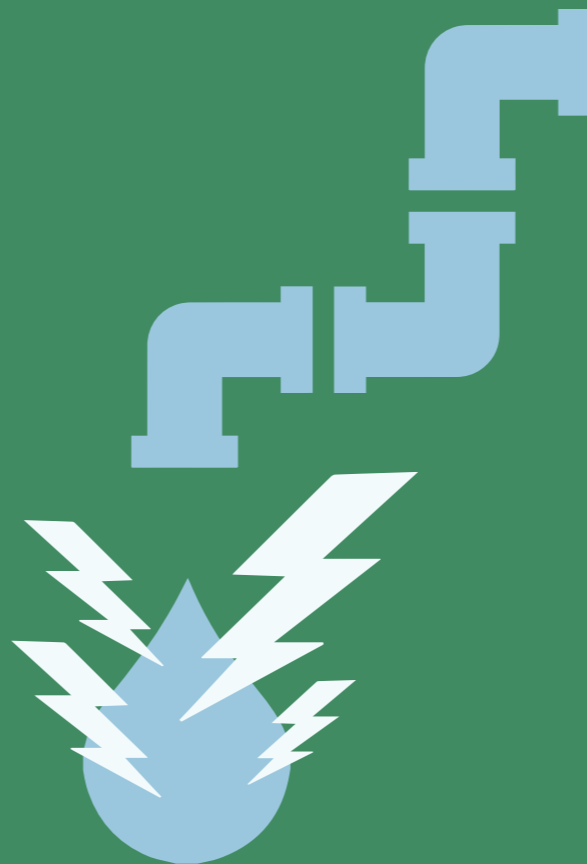

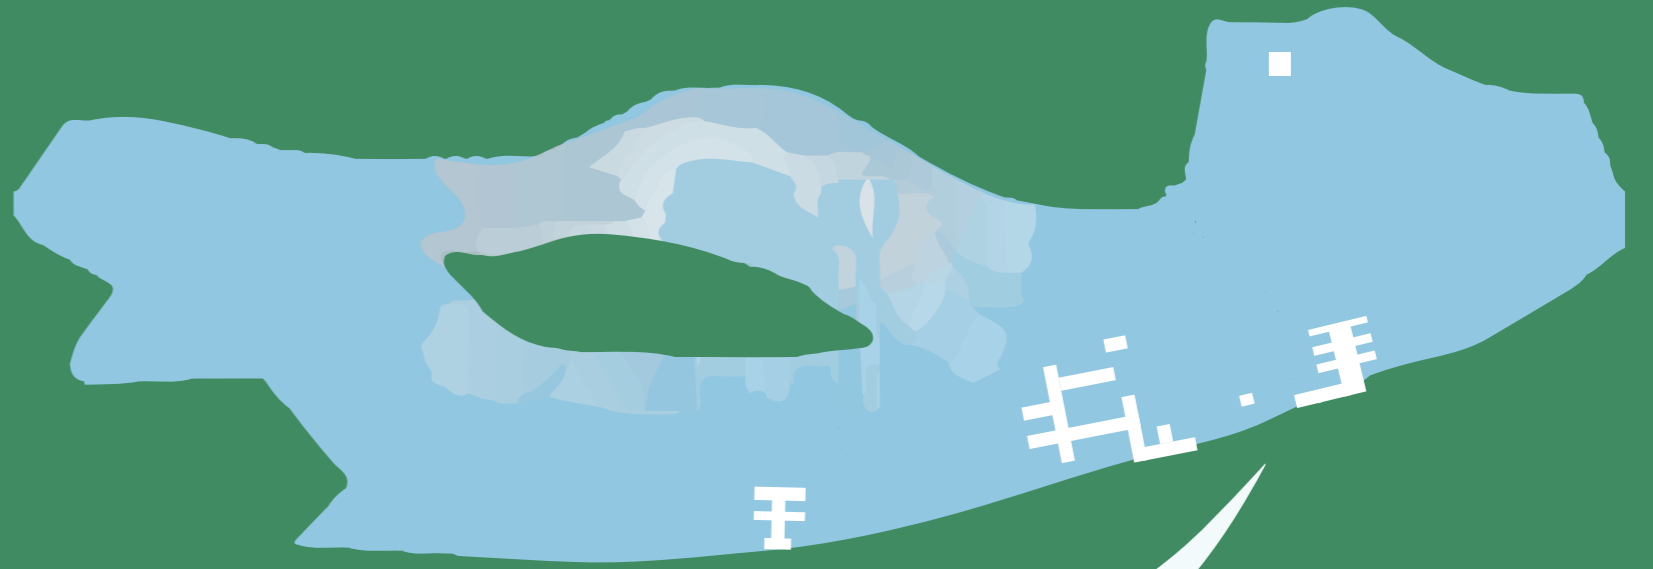

Stored in distribution centres...

Shipped again...

Stored in grocery stores where they were then purchased by you, packed in your camp duffels and shipped again...

Water is pumped from the lake and passes through micro filters that remove particles...

It is zapped with Ultraviolet light that kills microscopic bacteria and chlorinated so that it can remain clean...

The fresh, purified water supply at Camp Walden flows endlessly... so make sure you bring a canteen to fill up at our new water stations!
